2.1.49.1 Recreational Campground – RV: A parcel of land used exclusively for the parking of camper-recreational vehicle units that have their own self-contained waste containment systems. Establishment of overnight living quarters, such as tents or other temporary shelters that do not have their own self-contained waste containment systems are prohibited.

12.10.5 Other provisions of these Regulations notwithstanding, no specific campsite in a Recreational Campground may be permitted which is more than 300 feet from a toilet served by a sanitary sewage disposal system and no campsite shall be permitted within fifty (50) feet of any septic tank drain field. Campsites on a Recreational Campground – RV, all of which are limited exclusively to camper-recreational vehicle units that have their own self-contained waste containment systems, may be permitted without having to be located within 300 feet from a toilet served by a sanitary sewage disposal system. At least one sanitary toilet and shower facility and waste dumping station must be provided for use by any site occupant of a Recreational Campground – RV.

12.10.12 During the period from May April 1st to the following December 1st, the rental of camp sites is permitted. No camp site shall be occupied for more than thirty (30) days between November December 1st and the next following June April 1st. No visitors may claim residency during their stay and receive any benefits of residency such as voting, attending school, and receiving social services.
